## CURRICULUM VITÆ

Born in Barcelona in 1967, Marcos Viñals Bassols graduated with a Master of Fine Arts degree in scenography at the Superior National School of Visual Arts of La Cambre in Brussels, Belgium.

During the past 25 years he created scenic designs for theater and show in Belgium, France, The Netherlands, and abroad, working for several famous directors like Franz Marjnen or Dirk Decloedt. In 1998 he received the Belgian Theatre Award of the best scenographer. Marcos' unique vision enabled him to be nominated for this award on four other occasions.

Marcos expresses his visual poetry and his meaningful interpretations by creating fascinating scenic environments for large scale events and exhibitions. Some of them were awarded with the Silver Benelux Event Awards, and two Silver Awards at the 2014 European Best Event Awards.

Marcos has been collaborating as a scenographer in various occasions with Franco Dragone, for whom he has created scenic designs like for *Philip Kirkorov's* musical show at the Kremlin Theatre in Moscow and on tour, or *The Land of Legends* in Turkey, a large-scale Family Entertainment Center, where he designed a monumental poetic gate that became the set for Dragone's permanent show.

As a free lance scenographer and art director, Marcos created, designed and directed several shows in different countries of the Middle-East, like the *Bayan Palace Show*, the opening ceremony of the *Kuwait Museums*, or TV sets for musical shows like *Hala Layali Febrayer*, in the presence of His Highness the Emir of Kuwait and broadcasted live on the national television.

Since 1999, Marcos has been designing numerous exhibitions and museums, such as the permanent exhibition for the 200th anniversary of the *Battle of Waterloo*, 1800 sqm of themed exhibits and interactive installations at the Lion's Mount in Waterloo.

In 2018 Marcos was commissioned to design a world-class touring exhibition for the 60th anniversary of the Smurfs, *The Smurfs Experience*, a 1500 sqm immersive experience, with interactive exhibits, holographic projections, augmented and virtual reality, as well as engaging rides and spectacular sets in real size. After a great success in Belgium with over 250 000 visitors, the exhibition is planned to tour worldwide for the coming decade and is nowadays presented in Paris at the Porte de Versailles until October 2019.

Marcos also creates light art installations, like *Ovo*, a multi-sensory art installation presented for the first time in 2010 and still touring in major cities worldwide. He is also the designer of the *Tree Rings* light art installation, winner of an international competition for the Christmas lighting of the Avenue des Champs- Elysées in Paris, that has been seen by international audiences between 2011 and 2014.
