### Light show

Unique light show by world-known designers is to be represented in Astana on March 20 for the first time ever and prolonged till April 1. Residents of the capital can see it on any of these days at 21.00 on the square near "Bayterek" monument and in the Lovers' park, as it is reported by the organizers.

The light show will start simultaneously in both places with corresponding musical illustration. Endurance of one installation cycle near "Bayterek" monument will amount to approximately 8.5 minutes, and total continuance – about 2 hours.

In the Lovers' park audience can see monumental wooden egg, created on the base of golden ratio by the sculptors Mostafa Khadi and Paul Merchandise. Lightning designer Kurt Vermeulen and scenography worker Marcos Vinals Bassols have created animated and dynamic illumination of the sculpture bringing it to life.

Light show in Astana is to become a breath-taking performance. It is planned to involve in the installation incredible number of lightning elements. Powerful projectors and diods will illuminate the action, changing colours and creating holiday atmosphere.

According to the organizers, its peculiarity will be the use of new technological products in combination with unique plastics embodiment.
